

SQL HEALTH CHECK

CHOOSE SUPERIOR CONSULTING SERVICES

Information Technology Professionals, in conjunction with our partner 2.7 Strategies LLC, promotes stability, reliability, scalability, continuity, recoverability, and customizations within your environment. Our multi-tiered solutions verify all aspects of your environment are setup correctly, the environment is optimized, and provide you with a detailed action plan for managing your systems, as well as planning for future growth and navigating unforeseen disaster recovery events.

A monitored, benchmarked, and maintained environment enables predicting most potential events resulting in costly downtime, can recover more quickly than a non-monitored data environment, and are less likely to experience catastrophic failure and security breaches. Routine wellness procedures are an integral part of your systems **performance, stability, scalability, and recoverability.**

The first step in achieving a healthy environment is partnering with us as your trusted data services partner. We will maintain, recover, assess, monitor, and keep our environments running at peak efficiency. Our team of Database Administrators and ITP's data architects remain current with Microsoft SQL, as well as continually expanding our extensive list of certifications and happy customers. We devote our expertise to managing your environment, so you can focus on what you do best: **running your business.**

The Environment Health Check Includes:

- A 204-Point Inspection of your data environment
- Disaster Recover Analysis & Planning
- An Industry Best Practices Review
- A Virtual Storage & Environment Analysis
- A High-Level Network & Security Analysis

What you gain from an ITP / 2.7 Strategies SQL Health Check

Do you find yourself wasting time during the day waiting for reports to generate and screens to refresh, generally getting frustrated with unresponsive systems? This problem is primarily caused by your environment not being optimized and maintained. We specifically designed the Health Check to address this issue.

Imagine if everyone in your company saved 5 minutes a day in processing time? If you have 10 people in your company, that equates to 217 hours a year in time savings, based on the standard 260 working days. Additionally, let's consider for a moment that you get to work tomorrow morning and your data environment has failed. How would you answer the following questions:

1. Are you able to perform your job?
2. How long do you think it will take you to get your systems back on-line?
3. How many people are affected by your environments being off-line?
 - a. In your company?
 - b. At your customers?
 - c. At your vendors?
4. Can your business afford to be off-line for an hour? 8 hours? A week?
5. Who do you call when your system is unavailable?

Health Check Benefits

Every system is unique and so are the settings that define health and efficiency. After a complete review of your environment, we will present the findings and recommend the best course of action. Further intervention may include any of the following tasks.

Configuring your system

Through review and verification of hardware and software integrity, updates, and stability, our professionals will get your system running how it should be based on your hardware / software / server combinations and the proven best practices.

Performance Optimization Tuning

Leveraging our years of experience, we are able to optimize your environment by enhancing availability, performance, network communication, storage stability, and retention strategies.

Establishing Benchmark Measures

We capture your environment metrics before the Health Check and compare to the same metrics after remediation.

Establish Maintenance and Recovery Routines

Based on the newly documented understanding of your specific environment, we will guide you through establishing and testing Maintenance and Recovery plans.

SQL Health Check

Data Environment Health Assessment = \$2,500.00

50% of the estimated charge is due prior to the assessment.

The fees in this schedule do not include approved travel expenses. Travel is roundtrip from Brookfield, WI to your location.
